Love to Play Music, Snooker, Travel, Adventure & Explore

Decade of experience in the Information Technology industry in different phases of project including Requirement gathering, Analysis, Solution Design, Development, Implementation and Deployment in **Agile software development methodologies**

OVERVIEW

- ❖ Excellent experience in UI development using ReactJS using Redux/Hooks/TS, Bootstrap, integrating web services and unit testing with Jest, Cypress
- ❖ Hands on experience on development on Google App engine with GoLang/Python
- ❖ Continuous Integration (CI) and development (CD) using Git/Bitbucket, Jenkins, Docker etc.
- ❖ Good knowledge of Google Datastore, Google Query Language, MySQL, Soql
- ❖ An analytical Software engineer with deep expertise in development across various technologies and latest trends
- ❖ Highly organized, Quick Grasping power and Fun person with the ability to meet deadlines smartly
- ❖ Experience on Different platform, performing different roles including gathering and analyzing requirements, solution designing, reviews, client interaction, development, and implementation

EXPERIENCE

KINDRED GROUP, SWEDEN — SR. SOFTWARE ENGINEER JS

13, July 2020 – Present (4 Years)

ATOS-SYNTTEL, PUNE — CONSULTANT

16, July 2018 – 20, March 2020 (2 Years)

ETERNUS SOLUTIONS, PUNE — SENIOR SYSTEM EXECUTIVE

7, April 2014 – 12, July 2018 (4 Years)

EDUCATION

D Y PATIL INSTITUTE OF MCA, PUNE, INDIA — MCA

University of Pune - 2014

PT. DDUMC, MEERUT, INDIA — BCA

CCSU - 2011

MEERUT PUBLIC SCHOOL, MEERUT, INDIA — HSC

CBSE - 2008

ST. MARY'S ACADEMY, MEERUT, INDIA — SSC

ICSE – 2006

TECHNICAL KNOWLEDGE

FRONTEND: Vanilla Js, ES6+, HTML, CSS, Typescript

DATABASES: Google Datastore, MySQL, Postgres, SOQL, SOSL

CLOUD: GCP, Salesforce

TOOLS: Eclipse, Mavensmate, Git/Bitbucket, Sql Workbench, VsCode, Npm, Terminal, etc.

TESTING: Cypress, Optimizely, Jest, Apli tool

CURRENT PROJECT

KINDRED GROUP AB, SWEDEN, SR. SOFTWARE ENGINEER JAVASCRIPT

DOMAIN - BANKING IN GAMING | JULY 2020 – PRESENT

ReactJs (Hooks, TS, Micro Frontends) In house created web UI Components library, Cypress, Node, Rollup

Applications managing payments via different third parties providers as Trustly, Earthport, Adyen etc., responsible for a happy journey for a customer with a great User experience throughout the Deposit/Withdrawal process.

- Interacting and communicating with the business user in order to understand the business requirements
- Unit testing with Automation E2E testing with help of Cypress framework
- Integration and communication with backend application with API's
- Created and designed forms in order to implement the custom User Interface requirement
- Designed the architecture for development of the application
- Making the Micro frontend as reusable as possible to be used across organization with minimal or no change
- Created supporting libraries to make the usage modular
- Keeping the code most updated, and close to the best standards

PAST WORK EXPERIENCE

REACTJS - TS – REDUX/HOOKS (8+ YEARS)

ReactJs + Redux, Bootstrap, Salesforce, Jest, Enzyme , Css Frameworks, Java spring, Google Maps/charts, Prime React, Firebase, Jsp, SQL Server

- **Clydesdale and Yorkshire Group Products, Scotland, TL | Domain - Banking and Finance | July 18 – March 2020** - Application managing open account payments via different third parties like amazon and other retailers with different type of consents and payments like scheduled, standing orders, Immediate etc. with Open Banking PSD2, deployed for 6 weeks in Glasgow, Scotland to have meetings with the client to gather requirements and define the architecture and user flow for a new application product.
- **e-CPQ | ReactJs Lead | Retailing And Logistic | January 18 – July 18 | Team 4**- In House Product for replicating Salesforce CPQ in Ms-dynamics, responsible for end to end integration and development of UI in React
- **Godrej Real Estate | Sr. ReactJs Developer | Retailing And Logistics | September 17 – December 17 | Team 7** - Production for managing the real estate operation with different user roles within the organization, responsible for keeping the UI as managed as possible with minimum change requests
- **Zenifits | ReactJs developer | HR | December 2014 – April 2015 | Team 6** - A HR management software linked to Salesforce, application responsible for configuring the mother application via salesforce and integrated react application, responsible for developing the solution as per the client approved requirements
- **Twilio | ReactJs developer | HR | April 2015 – August 2015 | Team 6** - Telecom plans management software linked to Salesforce, application responsible for configuring the telecom plans via react application to the Salesforce's CPQ

EXPRESSION ENGINE

Expressionengine, Php, Html, Javascript, JQuery, Css, MySql

- **Culp | UI, Php Developer | Retailing And Logistics | December 14 –December 15 | Team 3** – A fabric organization dealing in upholster, fashion etc., I was responsible to maintain their 6 web application as culphomefashions.com, culpupholstrey.com, culp.com etc. presenting their products to the customers and taking orders for the same with billing system and PayPal, other payment gateways integration.

SALESFORCE + REACTJS (1.2 YEARS)

Force.com, Apex, Lightning, Html, Css, Visualforce, AWS Lambda, Google charts, NodeJs, JS, SOQL, SOSL

- **Aflatoun | Sr. ReactJs Developer, SF Developer | Learning and Education non-profit | March 17 – July 17 | Team 3** – A non- profit organization helps children for getting education through the platform, my responsibility in the project was to create a react application integrated in salesforce for getting the analytics of the performance and tracks of the students registered.
- **Lhm | Sr. JS Developer, SalesfSForce Developer | Retailing And Logistics | December 16 – February 17 | Team 2** – A retail company involve in trading of premium cars as Ferrari, Bentley etc., I was responsible to create a lightning application to get the feedback of the customer at the store providing dependent questionnaires' and send it to salesforce and create reports as well.
- **Fundraiser For Children | Sr. ReactJs Developer, SF Developer | Learning and Education non-profit | October 17 – January 18 | Team 3** – A non-profit organization helps children for getting education through the platform, my responsibility in the project was to create a react application integrated in salesforce for getting the analytics of the performance and tracks of the students registered.
- **Alexa Skill for in-house project | Sr. JS Developer, SF Developer | In House product | July 17 – October 17 | Team 1** - In house product for minimizing the human intervention for daily jobs related to salesforce as getting specific filtered report, new leads for the day, I was responsible to create the intents, skills and operations possible using Alexa device

GOOGLE CLOUD PLATFORM

Google App Engine, Html, Javascript, JQuery Css, Google Datastore, Google Contacts, Sendogo API

- **Eduction (eduation.my) - Google Appengine - Trainee -> Golang Developer -> Sr. developer | Learning and Education non-profit | May 14 –December 17 | Team 7->3->2**
 - Another non-profit organization helps children for getting education through the platform, the platform was a full virtual classroom for students who cannot afford education in Malaysia including assessments, results, teachers volunteers and a lot of features as google hangout anytime, chat etc.
 - Supported by google to promote Goaling
 - As a trainee and a new language (without support and resources) challenge, I was responsible to develop small module and going forward I was solely handling the project alone with one trainee to be trained on the same
 - I was supporting, providing solutions and developing old and new request for around 3 years simultaneously
- **Sendogo | Google Appengine – Pyhton Developer | Retailing And Logistics | January 15 – March 15 | Team 1** – A Sendogo client asked us to create a solution for their organization to link, delegate and operate the google contacts and integrate with Sendogo to send messages from themselves or their behalf. I was solely responsible for the project for full SDLC.
